

Remote control box for electric door curtain 3000/6000 w

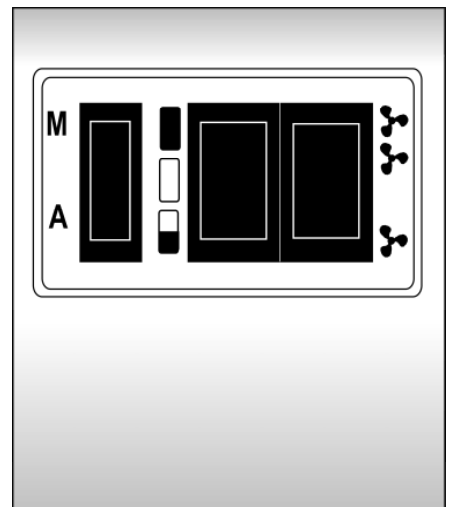

Description

3 buttons

1/ On/Off switch M = On - A = Off

2/ power switch 6000 w - nothing - 3000 w

3/ fan speed high speed - low speed

Mounting

Remove the 2 screws that hold the cover.

Fix the support onto the wall with 4 screws (diam. 4.5 mm)

Connect the wires and fix the cover with the 2 screws

Use

Press on the On position

Select the required power and the required fan speed

NB: - it is possible to use the fan only. Appliance operates as a ventilator

- as a safety rule, when any power is selected, the low speed operates automatically

Electric connection

Remove the 3 shunts: between B and C, between C and D and between D and E

Use a 4 or 5 wire power cord (diameter 1.5 mm²) + earth

As shown hereunder, after being connected to a 1st appliance ("rideau d'air No1"), the control box can drive another appliance ("rideau d'air No2"). It can drive up to 4 appliances.
